

Environmental Policy Statement January, 2020

Eventful Management GmbH endeavours to monitor and reduce the environmental impact of its business activities. We give preference to suppliers, sub-contractors, customers, and staff who demonstrate environmental awareness. Where possible and practical all timber and wooden sheet materials used in the construction of scenic services are sourced from FSC (Forest Stewardship Council) certified companies. We endeavour to use paints, lacquers and finishing agent products that are completely free from acrylics, vinyl resins and harmful petrochemical solvents (VOC) and that are emission neutral and allergy free. Excess, unwanted or unneeded but re-usable decorative products are redistributed where possible and practical into the community.

We re-use materials when possible, and re-cycle (or submit for re-cycling) paper, metals, softwood, and plastics, including delivery containers and packaging. All other waste is disposed of in a responsible manner using authorised waste management subcontractors who are monitored and audited. In common with our published Sustainability Policy (available on request or from our website) Eventful Management strives to maintain sound environmental practices at all times.

Eventful Management was accredited with DIN EN ISO 14001:2008 in 2011, an internationally recognised standard for the environmental management of businesses which prescribes controls for those activities that have an effect on the environment. These include the use of natural resources, handling and treatment of waste and energy consumption. As part of our ongoing commitment and environmental concern our processes were revised in 2016 and re-accredited with the newly upgraded DIN EN ISO 14001:2015, and further re-certified in December 2019.

This policy is subject to regular review and revision.
