

WASTE POLICY

Eventful Management GmbH is committed to minimising the amount of waste we generate. Our ultimate goal is to send **zero waste to landfill**.

We seek to monitor and comply with relevant legislation and regulations and dispose of our waste in a safe and responsible manner. We are also committed to the principles of the waste hierarchy.

Objectives

- Reduce the volume of waste that we produce
- Seek opportunities to re-use waste materials
- Maximise recycling of the waste we generate
- Minimise the amount of waste disposed to landfill.
- Influence our customers in their project planning to consider reusability of the products we produce for them

Key Waste Streams

- Waste products and manufacturing residues
- Packaging associated with the products and materials that we resource externally.
- Packaging generated through the handling of products in our facility

Implementation

The **company management** has overall responsibility for delivering this policy, and is responsible for:

- Ongoing development of waste management initiatives
- Review of contracts and disposal options
- Setting of objectives and targets
- Collation and annual review of historical performance data
- Keeping abreast of industry best practise and legislative changes
- Co-ordination with other policies and initiatives across the business.
- Co-operation with “Trash Galore” in Leipzig on larger events to establish specific channels local to the event location for the distribution and sustainable re-use of event content.

Day-to-day implementation of waste initiatives rests with **operations managers** in each operational area, supported by the company management.

All **employees** and **sub-contractors** have an important role to play. Regular communication with internal and external parties promotes awareness of waste management activities and their role in delivering them.

Where appropriate, we engage with our **suppliers and business partners** to explore opportunities to generate less waste and reduce the amount of packaging associated with the products we sell.

Eventful Management is certified to and compliant with DIN ISO EN 14001:2015 (Recertification in December 2022 and December 2025)

This Waste Policy and historical analysis of waste disposal is available on request and on our web site at
